Laravel – HTML to LARAVEL

HTML to Laravel – STEP 1

Copy all the folders and files except .html files and paste to public/ folder.

HTML to Laravel – STEP 2

Skylab Engineers
Excellence in Technology

Make common files -

header.blade.php

footer.blade.php

master.blade.php

HTML to Laravel – STEP 3

Open master.blade.php :

```
@include("header")

    @yield("content")

@include("footer")
```

HTML to Laravel – STEP 4

Make inner pages - index.blade.php, about.blade.php, etc.

HTML to Laravel – STEP 5

In the inner pages, write the code:

```
@extends("master")
@section("content)
....
....
@endsection
```

Paste HTML Code
